Objective

Highly motivated Full Stack Developer with hands-on experience in MERN stack development, RESTful APIs, authentication, and scalable web application development. Skilled in building responsive and secure applications using React.js, Node.js, Express.js, and MySQL. Passionate about applying problem-solving skills and technical expertise to contribute to innovative and impactful projects.

Education

B.Tech in Computer Science and Information Technology Marri Laxman Reddy Institute of Technology and Management Percentage: 76%	2022 – 2026
Intermediate in MPC Telangana Model School & Junior College Percentage: 72%	2020 – 2022
10th SSC Telangana Model School CGPA: 9.3	2019 – 2020

Technical Skills

Languages:	Java, SQL, JavaScript
Frontend:	HTML5, CSS3, React.js, Angular (Basics)
Backend:	Node.js, Express.js, RESTful APIs
Databases:	MySQL, PostgreSQL
Authentication:	JWT, Role-Based Access Control
Soft Skills:	Time Management, Adaptability

Internship

Backend Developer Intern — CodexIntern	Remote Jul 2025 – Aug 2025
- Built scalable backend applications using Node.js, Express.js, and MongoDB with secure user authentication and database integration. - Architected two backend projects with RESTful CRUD APIs, login systems, and role-based access control, boosting system reliability and data security. - Optimized API performance using JWT, reducing response times by 20% and improving overall application efficiency. - Gained practical experience in API testing, debugging, and deployment following industry-standard development practices.	

Projects

Drug Inventory and Supply Chain Management System Full Stack Developer	GitHub 
- Developed a full-stack Drug Inventory and Supply Chain Management System using React.js, Node.js, Express.js, and MySQL/PostgreSQL to manage medicine inventory, procurement, and distribution operations. - Built secure RESTful APIs with JWT authentication and role-based access control (RBAC) for Admin, Vendor, and Hospital users. - Implemented real-time inventory tracking, low-stock alerts, procurement management, and analytics dashboards to improve supply chain efficiency. - Optimized database queries and backend performance to ensure scalability, data integrity, and responsive user experience. - Utilized Git and GitHub for version control and collaborative development.	
Doctor Plus – An AI-Powered Health Partner Full Stack Developer	GitHub 
- Built an AI-powered healthcare web application using React.js, Node.js, Express.js, and Firebase with a scalable and responsive architecture. - Integrated Gemini AI API for symptom analysis and real-time first-aid recommendations to enhance healthcare assistance and decision-making. - Implemented Google Maps API for nearby hospital and ambulance location tracking to support emergency healthcare services. - Developed secure authentication, responsive UI components, and optimized backend APIs for improved application performance and accessibility. - Applied full-stack development best practices, API integration, and cloud-based data management for reliable healthcare solutions.	

Certifications

Google Generative AI Certificate — Google	Jul – Sep 2024
